

Fully Automatic Punching System with Digital or Manual Format Adjustment

AP 360 (digital)

AP 360, MOBI 500 and AB 500 machines are made in Germany, and are engineered of quality heavy gauge metals.

PROFESSIONAL LINE

Offers shortest setup time for all types of special punching and loose-leaf binding operations.

The **AP 360 Automatic Punch** is available with digital (**AP 360 Digital**) or manual display (**AP 360 Manual**). Both offer format adjustment without tools ensuring the quickest setup time available.

The **AP 360** features a two-finger pick up system for consistent paper pick up even when mixing paper types and heavy weight stocks. Format changes with QSA (quick size adjustment) dies average 3-5 minutes. Punching speeds average 40-100 strokes per minute for high levels of performance whether the run is small or extremely large. The compact profile of the **AP 360** is mounted on wheels and can easily pass through standard doorways.

RENZ RING WIRE[®] Semi-Automatic Mobile Wire Comb Binding Machine

PROFESSIONAL LINE

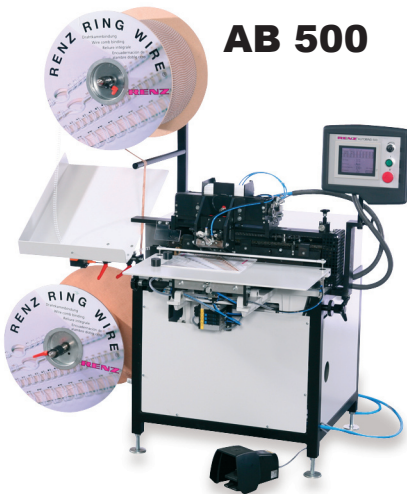

For book, skip and calendar binding.

The **MOBI 500** is equipped to close 13 wire diameters in 3:1 and 2:1 pitches from 3/16" to 1-1/4" diameters. With an operator friendly touch screen control, rapid format changes are simple and easy to set. Features automatic paper format and binding station adjustment, and lifting device for quick operator-friendly spool change. Changeovers are quick and easy and average 5-10 minutes. Practical binding output of 700-800 units per hour includes a footswitch that activates the transport to the binding station. An automatic feed calendar hanger dispenser (**KA 300**) or roll dispenser (**KA300R**) can also be added. The **MOBI 500** is mounted on wheels for easy relocation.

MOBI 500

AB 500

RENZ RING WIRE[®] Semi-Automatic Wire Comb Binding Machine

PROFESSIONAL LINE

Higher performance book, skip and calendar binding.

The **AB 500** (Autobind 500) is a higher performance machine with practical binding speeds of 1300 books per hour or 1000 calendars per hour and has a binding width of 20". Individually-sized closing bars and a unique binding mechanism make it easy to change wire diameters from 3/16" to 1-1/4" diameters in 3:1 and 2:1 pitches. Short set up time, touch screen control panel with error diagnostics, automatic horizontal paper feed and automatic closing create efficiency and optimum production rates. The **AB 500** is also available as a high speed machine with an integral take-away belt and shingle conveyor (**AB 500 HS**).
