

T-30 Thermal Binder **Binds Documents up to 1 Inch Thick**

- Durable light gray plastic shell.
- Easy operation with buzzer and indicator light.
- Built-in cooling rack for improved performance.
- Maximum spine thickness: 1"
- Maximum spine length: 11.8"

The new T-30 thermal binding machine is a wonderful high quality thermal binding machine designed to bind documents up to 1" thick or you can bind multiple documents at one time up to 1" total thickness.

The T-30 is incredibly simple to use. All you have to do is place your document in the machine and wait until the buzzer sounds, letting you know that the binding process is finished. The T-30 has a built in cooling rack attached to the back of the machine providing a convenient place to let one set of documents cool while you bind the next ones.
