

Protection against fine dust

DAHLE CleanTEC® Shredders

Air pollution poses a health risk not only outdoors, but also in the office. Copiers, printers and fax machines are known sources of dust polluted air. Document shredders are also known to produce dust particles which can effect air quality.

DAHLE CleanTEC® shredders are equipped with an innovative dust filtration system. Bothersome fine dust is collected directly above the cutting cylinders, and captured in a filter before it enters the air.
