

Rotatrim Pro Series® Heavy Duty Trimmer

New & Improved!

Originally designed with the photographer in mind, the heavy-duty use Rotatrim Pro Series has proven its durability and worth as an “all-day, everyday use” trimmer in a variety of industries. The Pro Series has been used to cut offset printing plates, packaging materials, polyethylene and even mount board- as well as for office finishing products.

The Rotatrim Pro Series is perfect for heavy-use cutting and trimming of flexible materials:

- Solid one inch thick baseboard and 1/12 inch edging strip provides extra stability and long durability
- Dual stainless steel guide rails eliminate cutting head swivel while delivering a smooth gliding action
- Self-sharpening, absolute precision steel blades
- All-metal end frames and head, and an aluminum square side rule
- 12”, 15”, 18”, 20”, 24”, 30”: up to 3mm cut capacity
- 36”: up to 2mm cut capacity
- 42”, 54”: up to 1.5mm cut capacity

Dual stainless steel guide rails eliminate cutting head swivel

Solid 25mm laminate grid baseboard with cross hair paper size markersboards.

Steel Stand

The steel stand offers rigid support at the ideal working height of 34 inches. Black finished, this stand includes an integrated, transparent space-savings waste catcher that secures off cuts.
