

The Monorail is designed for the slightly more occasional user – the professional – seeking a quality trimmer that won't be in use all day, every day. Maybe you're a photo or framing enthusiast who wants the best but you don't need the same durability of a heavier-duty trimmer? Or maybe you work in the education field and are in need of a premium machine, but without the premium price?

The Monorail is perfect for medium-use cutting and trimming of flexible materials, offering smooth-glide cutting action:

- A single chrome-plated guide rail is extremely resistant to head swivel.
- Design offers a maximum cut depth of up to 2mm.
- A solid laminated gridded baseboard ensures accurate placement of work.
- Virtually indestructible ABS plastic end frames and head equate to 20-25 years of performance.

- Medium-duty use
- ISO9001:2008 quality certified
- Self-sharpening Sheffield Steel cutting wheel
- Hand-finished flat blades
