

ESM 20

The **ESM 20** is an extremely robust round cornering machine for radii and angle cuts. Solid construction and precise guides and stops combined with through-hardened German steel cutting blades ensure perfect punching results. Whether a round or angle cut, the **ESM 20** punches easily through a variety of materials and up to *400 sheets of paper. The **ESM 20** can also punch cardboard, plastics, textiles, leather, light metals, and much more. A compact ergonomic design and quick change dies round out the ease of use and added value. Perfect for giving business cards, playing cards, calendars, brochures, etc., an individual and professional design.

ESM 20
Manual round cornering machine

Customer Benefits

- Extreme robust construction
- Quick change punching tools
- Compact ergonomic design
