

# BB520P Speedbind

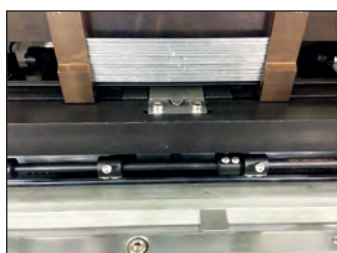

## PUNCH & BIND YOUR CALENDARS IN LINE

The **BB520P** the latest addition to the range of high speed automatic punch & Wire-O® bind machines from JBI, provides top productivity level in a minimum footprint. It features a quick return investment for your wall calendar requirements allowing large formats of up to 520 x 800mm.

### FEATURES

- The **BB520P Speedbind** is a fully automatic high speed punch & bind machine specially dedicated for wall calendars that can be used by one operator only.
  - Calendars to be bound can be fed from a high pile feeder or simply directly by the operator.
  - Hangers are formed by the machine from straight rods.
- The **BB520P Speedbind** is one of the fastest automatic punch & bind machine in its category for wall calendars. Its production speed ranges from 1,000 to 3,000 calendars / hour pending on format. Yet simple to run, it allows high productivity and quality finishing.
- The **BB520P Speedbind** is user-friendly. Its control panel makes it easy to program. All mechanical adjustments as well as the punching tool, Wire-O® insertion guide & closing tool changes are easily accessible.
- The **BB520P Speedbind** is a production machine for large runs but it remains versatile through the possibilities to deactivate the punching module or the hanger feeder module and to use the optional nail hole punching module for wall calendars with suspension holes.
