Onglematic O5

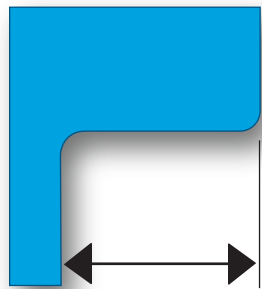

Tab Cutter

STANDARD (15° ANGLE)

DOUBLE ROUND CORNER

James Burn Onglematic O5 Tab Cutter is a guillotine-style index tab cutter with electric positioning and manual cutting action. This table-top unit is equipped with a choice of cutting dies that creates step tab sets.

Operation is efficient, the stops moves from one stop to the next automatically and the operator simply pushes the cutting handle down. The pre-fixed tab length is calculated so each tab is identical from 1/2 cut to 1/12th cut tabs. Create perfectly aligned edges with the magnetic lateral stop and ruler.

Offer your customers what others can't, quick turn-around on tabbed products. Produced in-house so you control the lead time.
