

Applying grommets couldn't be any easier! CSBUR-1 is designed to apply especially for large size #12 (40 mm) eyelets. It is a reliable and heavy-duty machine that does not need any extra pneumatic or electrical power. With its extra-long lever and force-transfer mechanism, the need for manual labor is minimal while generating high mechanical impact for large grommets.

COMPATIBLE DIES & SELF PIERCING GROMMETS

The CSBUR-1 Pneumatic Machine uses manual grommet & washer feed and is compatible with ClipShop brand stainless steel interchangeable self-piercing dies for grommets.

NAME	#XX00	#X00	#00	*#0	#1	*#2	#3	#4	#5	#5.5
SIZE	1/8"	11/64"	3/16"	1/4"	5/16"	3/8"	7/16"	1/2"	5/8"	11/16"
