Transform Shipping Cartons Into Eco-Friendly Packing Materials...

The **Greenwave 410 Cardboard Perforator** has the solution to help transition from single-use plastic and foam packing materials. Using **heavy-duty solid steel blades**, it transforms corrugated shipping cartons into high-quality eco-friendly perforated packing materials. This **compact unit fits on a tabletop or shipping work bench**, making it ideal for small shipping departments. Operation is easy: choose the finished size of the packing materials, adjust the cutting guide, press start, and insert cardboard. The result is **flexible, shock-absorbing netting** which is easy to wrap around objects to provide protective cushioning during shipment. It's **essentially producing free packaging material**, and can promote a sustainable image to customers. Standard features include an **all-metal housing**, **solid steel perforating blades**, **rugged metal gearing**, a **bold-print measuring scale**, **rubber suction feet for stability**, and **side carrying handles**.

**Trim to the Perfect Size**  
*Simply set the side guide to trim cardboard to the custom size of your product and shipping box*

**Simple Push-Button Control**  
*Start, stop, and reverse easily with a single toggle switch*

**Perforation Transformation**  
*Cardboard up to .4" thick is quickly transformed into valuable net-like cushioning packing material*

The Environmentally Friendly Greenwave 410

- REDUCE:** Reduce or eliminate the need to purchase costly single-use plastic or foam packing materials, as well as reducing waste disposal costs.
- REUSE:** Reuse the cardboard packaging you already have.
- RECYCLE:** Use an existing product instead of buying new packing materials.
