Transform Shipping Cartons Into Eco-Friendly Packing Materials...

The **Greenwave 430 Cardboard Perforator** has the solution to help transition from single-use plastic and foam packing materials. Using **heavy-duty solid steel blades**, it transforms corrugated shipping cartons into high-quality eco-friendly perforated packing materials. This **freestanding unit** features heavy-duty casters for easy mobility and a **molded plastic waste bin**. Operation is easy: choose the finished size of the packing materials, adjust the cutting guide, press start, and insert cardboard. The result is **flexible, shock-absorbing netting** which is easy to wrap around objects to provide protective cushioning during shipment. It's **essentially producing free packaging material**, and can promote a sustainable image to customers. Standard features include an **all-metal housing**, **solid steel perforating blades**, **rugged metal gearing**, and a **bold-print measuring scale**.

Trim to the Perfect Size
Simply set the side guide to trim cardboard to the custom size of your product and shipping box

Simple Push-Button Control
Start, stop, and reverse easily with a single toggle switch

Perforation Transformation
Cardboard up to .4" thick is quickly transformed into valuable net-like cushioning packing material

The Environmentally Friendly Greenwave 430

- REDUCE:** Reduce or eliminate the need to purchase costly single-use plastic or foam packing materials, as well as reducing waste disposal costs.
- REUSE:** Reuse the cardboard packaging you already have.
- RECYCLE:** Use an existing product instead of buying new packing materials.
