

CLIPSSHOP SELF-PIERCING GROMMET DIES

Our self-piercing dies are engineered to work with our grommet hand presses and pneumatic setting machines, meeting the needs of most applications. Be able to set a grommet in a single action without pre-punching a hole, increasing down-time and the cost for job setup. ClipsShop self-piercing grommet dies are made from stainless steel, high-quality and extremely durable.

All our grommet setting machines are compatible with 10 sizes of self-piercing grommet attacher dies.

NAME	#XX00	#X00	#00	*#0	#1	*#2	#3	#4	#5	#5.5
SIZE	1/8"	11/64"	3/16"	1/4"	5/16"	3/8"	7/16"	1/2"	5/8"	11/16"

Self Piercing Grommets 1/8" ID (#XX00) up to 11/16" ID (#5.5) are available in Nickel, Brass, Black Oxide, Antique Brass and **select grommets in White*.

TWO-STEP DIES FOR CURTAIN EYELETS

These carefully engineered stainless steel grommet cutting & attaching dies combine together two steps with a single die. The first step will pierce a hole in the material as a cutter die and in a second step with the same die (without removing it from the grommet press attaching machine), the grommet attacher die will set the grommet into the material. There is no added expense for two separate dies and no need to pre-cut a lot of holes leaving a large pile of work in process prior to attaching grommets.

Cut holes and set large #7.5 (25 mm), #8.5 (28 mm) & #12 (40 mm) grommets faster reducing labor cost & increasing productivity and - with no need to register the material a second time - create less waste!

NAME	#7.5	#8.5	#12
SIZE	1"	1 1/8"	1 1/2"

#7.5 and #8.5 eyelets are available in Nickel, Brass, Black Oxide, Antique Brass. #12 eyelets are available in Satin Nickel, Satin Brass, Gun Metal and Copper Oxide.
