GBC® FOTON® 30 AUTOMATED POUCH-FREE LAMINATOR

The world's first fully automated desktop laminator that feeds, laminates and trims with the touch of a button. From start to finish, the GBC® Foton® 30 simplifies the lamination process and does all the work for you.

FEATURES:

Lamination Made Simple

Just place documents in the tray, press run and walk away. Save significant time compared to manual pouch lamination.

No More Pouches

This machine uses auto-threading film cartridges from GBC, which means you no longer need to open individual pouches and feed them one-by-one. Plus, the reloadable cartridge can only load one way, which eliminates film loading errors.

Easy to Use

Create flawless documents at the touch of a button. The GBC Foton 30 automatically detects film thickness, straightens papers as it feeds, controls spacing and trims the finished documents for neat and even results.
