GBC® ULTIMA™ 65
THERMAL ROLL LAMINATOR

Protect and preserve your most important printed documents with the Ultima 65 Laminator. The EZLoad™ film system makes loading fool-proof, while the pivoting feed table provides easy access for film changing. The features included help to shorten film loading time by 50%, making it the perfect choice for busy educators.

FEATURES:

Comprehensive Lamination

Get clear results for a wide variety of projects up to 27". Laminator warms up in less than 10 minutes and is perfect for posters, handouts, teaching aids and more.

User-Friendly Features

Laminator includes a pivoting table, one-touch AutoSpeed function, alignment guides and built-in trimmer. AutoGrip shafts simplify standard film loading. EZLoad film has color-coded end caps that ensure the film is loaded correctly.

Less Film Waste

Features front and back stop buttons to easily pause lamination for loading or cutting. A footage counter tracks the film usage.
