Quickly and Efficiently Shrink Wrap

- Ideal for quick and easy shrink film packaging (seals 6-8 packages/minute)
- Heavy duty construction for durability
- Works with heat gun or shrink tunnel (CN-4520A)
- Includes work table with film separator, twin perforating hole puncher and film roller

Video Demo →

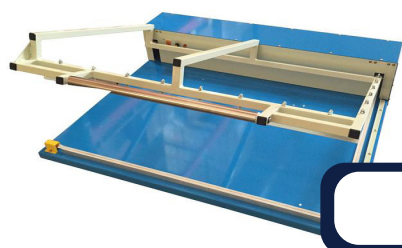

The **YC-Series L-Bar sealers** are designed for fast and efficient shrink wrap packaging, delivering a factory-fresh appearance for your products. These sealers create packages that are protected from dust, moisture, and fingerprints, regardless of the product's shape. With our shrink wrapping system, you can also help deter tampering and shoplifting.

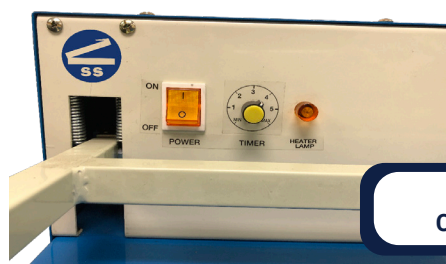

The YC-Series sealers provide sharp, clean seals and cuts in a single step, accommodating films up to 24" wide, depending on the model. Built with durable steel construction, these sealers offer reliability and long-lasting quality. The sealing time is precisely controlled by an electronic timer.

Easy Operation: Set the timer. Place your product between two layers of centerfold film. Bring sealing arm down to activate sealing process. Use a heat gun or shrink tunnel (we recommend our CN-4520A) to shrink the film tightly around the package. Please note our L-Bar sealers do not include a heat gun or shrink tunnel. Must be purchased separately.
