## GBC® PINNACLE™ EZLOAD™ THERMAL LAMINATOR

A great laminator for schools that is packed with time-saving, user-friendly features. From its EZLoad technology, which eliminates film loading mistakes, to its visual/audible warm-up alert, built-in trimmer and more, this laminator is an easy choice for busy educators.

### FEATURES:

#### Fast Thermal Lamination

Warms up in 8-10 minutes and laminates at speeds up to 10' per minute. Achieve clear and protected projects up to 27" wide, perfect for large posters, handouts, bus tags and more.

#### EZLoad Technology

This specialized technology helps to eliminate film loading errors. Color-coded end caps show the correct way to load film, which helps avoid accidental upside down loading and costly service calls.

#### User-Friendly Features

A footage counter tracks the remaining film, and a digital temperature readout ensures film is running at the correct heat. Built-in trimmer quickly cuts laminated documents from the roll. Machine enters standby mode after 2 hours of inactivity and will shut off after 3 hours to ensure safety.

Lamination Type	Thermal
Roll Width	27"
Thickness	Up to 3 mil
Laminating Speed	120"/min.
Speed Control	Manual
Stop Buttons	1 Button - Front
